## Experiment : 01

Create web API for passport system

### Aim :

To Create web API for  
Passport Application system.

### Procedure :

\* open zoho application in your  
system / Laptop.

\* using your E-mail and phone  
number login into zoho.com.

\* After Entering your OTP you  
can able to access zoho.com.

\* Select Creator from Home page

\* On right top side click Solutions  
then then give name for your API.

\* Click ~~Add Scratch~~, <sup>click new template</sup> your web  
API will be appeared on the screen

on that screen there are

many options like Name, Email, Address, phone number etc...

\* According to your web API you can select and drag them into screen.

\* For Passport Application system we can use Name, Email, Address, etc... (as required for passport system)

\* After that we want to save it.

\* After saving we want to check whether the given input is right.

\* After that we can able to use that ~~passport~~ Passport Application system.

Result:

The given web API for Passport Application system is successfully Executed.

Output:

## PASSPORT
